

Essentials of IBM Rational DOORS Next Generation, V5.0 Information

- Length:** 8.0 Hours
- Ref:** QN171G
- Delivery method:** Classroom
- Price:** AUD

Overview

This course teaches analysts and engineers how to define, elaborate, organize, and manage textual and graphical requirements and requirements-related information in IBM® Rational® DOORS Next Generation.

Rational DOORS Next Generation is a key component of the Rational solution for Collaborative Lifecycle Management (CLM). The product provides requirements definition and management capabilities in a fully-integrated environment that can also include IBM® Rational Team Concert™ for change and configuration management, and IBM® Rational® Quality Manager for quality management.

Public

This basic course is for:

- Business Analyst
- Systems Engineer
- Software Engineer
- Requirements Engineer
- Requirements Manager
- Requirements Team Leader

Prerequisites

There are no pre-requisites for this course.

Objective

After completing this course, you should be able to use IBM® Rational® DOORS Next Generation, part of the IBM jazz based solution for requirements management to:

- View and work with requirements and other artifacts in a collaborative context
- Create and edit requirements documents and other artifacts, including both textual and graphical artifacts
- Create, manage, and view traceability relationships between requirements and other artifacts

- Manage requirements throughout a project lifecycle

Topics

- View and work with requirements and requirements-related information in a collaborative context
- Capture, define, elaborate, and edit requirements and requirements-related information, and create hierarchically organized requirements documents
- Create and manage traceability relationships between requirements and requirements-related information
- Manage requirements throughout a project lifecycle
