

## AIX Network Installation Management Concepts and Configuration Information

**Length:** 2.0 Days  
**Ref:** AN22G  
**Delivery method:** Classroom Instructor Led  
Online  
**Price:** EUR

### Overview

The primary goal of this course is to provide you with a working knowledge of the fundamental capabilities of the Network Installation Management (NIM) facility of the AIX 7.1 operating system. This course uses a combination of instructor lecture and machine exercises to provide you with practical background knowledge of the topics covered.

### Public

This course is appropriate for anyone with system administrative duties installing and managing an AIX operating system in a multiuser POWER (System p) environment.

### Prerequisites

You should have:

- Basic knowledge regarding AIX systems administration
- Basic knowledge regarding the use of HMC V7 to manage POWER-based managed systems

The following course will provided the needed skills for this course:

- *Power Systems for AIX I: LPAR Configuration and Planning (AN11G)*
- *Power Systems for AIX II: AIX Implementation and Administration (AN12G)*

### Objective

- Explain key NIM concepts and terminology
- Display NIM-related information
- Set up a NIM master
- Perform a base AIX (RTE) install
- Define and use several types of NIM objects
- Perform an automated install
- Create and use mkysb resource

- Maintain lpp\_source and SPOT resources
- Update NIM clients

## Topics

### Day 1

- Welcome
- Unit 1: NIM overview
- Exercise 1: NIM overview
- Unit 2: Setting up the NIM master
- Exercise 2: Setting up the NIM master
- Unit 3: RTE installation
- Exercise 3: RTE installation
- Unit 4: Defining additional base install resources

### Day 2

- Exercise 4: Defining additional base install resources
- Unit 5: NIM client backups and restores
- Exercise 5: NIM client backups and restores
- Unit 6: Managing the lpp\_source and the SPOT resources
- Exercise 6: Managing the lpp\_source and the SPOT resources
- Unit 7: NIM client updates
- Exercise 7: NIM client updates
