

IBM Cognos TM1: What's New (V10.1) - SPVC Information

- Length:** 2.0 Days
- Ref:** J1158G
- Delivery method:** Self-paced Virtual Training
- Price:** EUR

Overview

This is the self paced training version of "IBM Cognos TM1: What's New (V10.1)" classroom course. IBM Cognos TM1: What's New (V10.1) is a two-day, self-paced training course that combines material and hands-on practice in using new features in TM1 version 10.1. The course outlines basic usage of the new features for analysis, modeling, and administration. Students will learn how to create an analysis using Cognos Insight. They will also use Performance Modeler to create model objects and deploy applications. In addition, they will learn how to use the new Operations Console to monitor the TM1 environment.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.

<http://www.ibm.com/training/terms>

Public

This intermediate course is intended for Administrators.

Prerequisites

You should have:

- Basic knowledge of OLAP
- Basic knowledge of previous editions of TM1

Objective

Please refer to course overview.

Topics

Overview of IBM Coanos TM1 10.1

- identify the IBM Cognos TM1 solution
- review the updated architecture
- describe new components

Analyze Data in Cognos Insight

- import data from various sources
- analyze and calculate data in your workspace
- design a compelling workspace with widgets, tabs, and themes
- publish a workspace

Introduction to Cognos TM1 Performance Modeler

- describe IBM Cognos TM1 Performance Modeler
- explore Performance Modeler
- manage and organize a model

Create and Customize Dimensions

- create dimensions manually
- import dimensions
- edit dimensions
- create dimension calculations

Create and Customize Cubes

- construct a new cube
- describe cube properties
- edit a cube structure
- review and use a pick list

Import Data

- identify data sources
- create processes to load data
- create processes to update and maintain the model

Share Data Across Cubes with Links

- identify types of links
- create and modify links
- review rule and process based links

Customize Business Rules

- describe a rule
- review automatically generated rules
- identify order of rule blocks
- disable and enable rules and feeders

Create Applications

- identify application types
- access an IBM Cognos TM1 application
- create a new application
- set the available clients
- activate and deactivate an application

Additional Modeling Techniques

- create dynamic subsets
- use dimension functions
- implement business logic

Administer TM1 Servers with the Operations Console

- add the admin and TM1 server to the Operations Console
- set up the environment
- check the health status of the servers
- filter the status of the server

Use the IBM TM1 Package Connector (Optional)

- describe the package connector
- import dimensions and a cube from a Cognos package

Additional New Features (Optional)

- identify additional new features in version 10.1 of IBM Cognos TM1

□
