

IBM® Emptoris® Strategic Supply Management System Administration Information

Length: 0.2 Day
Ref: 6D55G

Delivery method: Web-Based Training

Price: EUR

Overview

This 2 hour interactive web based course enables you to design and develop the global administrator functionalities of IBM Emptoris Strategic Supply Management (SSM)

This course defines the administrative tasks that are performed by the system administrator. It explains how to setup properties like currency, exchange rates and languages which define the functional aspects of the application. This course also explains how to manage the batch upload and bulk update processes, business processes and workflows and how to work with data sources and data rules.

The contents of this course are presented in an interactive format which many of you will find engaging and fruitful.

This course provides recorded demonstrations along with the informational content. The lesson checkpoints at the end of each lesson help to check your knowledge and reinforce the concepts you learned.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.

Public

This intermediate course is for System Administrators who grant access to all global administrator functions in SSM and also to applications like Contract Management, Sourcing, Spend Analysis, Supplier Lifecycle Management, Program Management and Virtual Supply Master.

Prerequisites

You should take the following course prior to taking this course:

- *Introduction to IBM® Emptoris® Strategic Supply Management (V10.0) (WBT) (6D438)*

Objective

- Describe the multi-currency environment and exchange rates in IBM Emptoris Strategic Supply Management platform
- Specify a language for the application and also set up the default language during installation
- Describe the bulk update and batch upload process in Emptoris Strategic Supply Management
- Create and manage business process and workflows in Emptoris Strategic Supply Management
- Create data sources and data rules
- Access the documentation through the IBM Publication Center

Topics

- Course Overview
- Unit 1. Currency and Exchange Rates
 - Lesson 1.1 Currency
 - Lesson 1.2 Exchange Rates
- Unit 2. Languages
 - Lesson 2.1 The Language Module
- Unit 3. Bulk update and Batch upload
 - Lesson 3.1 Bulk Update
 - Lesson 3.2 Batch Upload
- Unit 4. Business Process and Workflows
 - Lesson 4.1 Business Process
 - Lesson 4.2 Workflows
- Unit 5. Data Sources and Data Rules
 - Lesson 5.1 Data Sources
 - Lesson 5.2 Data Rules
- Unit 6. User Documentation
- Course Wrap Up
