

IBM Case Manager 5.1 - User Interface Development Information

Length:	5.0 Days
Ref:	F080G
Delivery method:	Classroom Instructor Led Online Self-paced Virtual Training
Price:	EUR

Overview

This course provides information about customizing the Case Manager Client application, Case management REST APIs and creating custom widgets that uses these REST APIs. You work with a fully functioning IBM Case Manager system to practice these skills.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.
