Maximo 7.6 MultiOrganization and Site Setup Information

Length: 4.0 Hours

Ref: W0113G □

Delivery method: Web-Based Training

Price: INR

Overview

This course discusses the multi-organizational and site capabilities of Maximo, the initial data required to implement Maximo, a detailed examination of the various organization options, classification structures and creation of the location and the corresponding data. The course is delivered via interactive simulations where you have an opportunity to learn and potentially interact with the system while we lead you through the functionality. At the end you can test your knowledge by completing the short quizzes. These simulations may aid you in preparing for certification on the product.

Public

IT Service, Sales, Support

Prerequisites

None
